EDUCATION

GOVERNMENT FIRST GRADE COLLEGE , CHIKKANAYAKANAHALLI **2023 – 2026**
BAC - BECHELOR of COMPUTER APPLICATION *CGPA: **7.69***

RP - Residential PU College, Kadur **2021 – 2023**
KARNATAKA SCHOOL EXAMINATION AND ASSESSMENT BOARD *Percentage: **70%***

MORARJI DESAI RESIDENTIAL SCHOOL-BC, MUDIGERE **2021**
KARNATAKA SCHOOL EXAMINATION AND ASSESSMENT BOARD *Percentage: **82.88%***

INTERNSHIP

Java Full Stack Developer Intern **Sept 2026**
Tap Academy

- Developed a strong foundation in Java programming, covering OOP concepts, collections, exception handling, multithreading, and file handling.
- Gained hands-on experience in frontend technologies, including HTML, CSS, JavaScript, and responsive web development.
- Learned backend development using Java, JDBC, Servlets, and JSP to build dynamic web applications.
- Worked with MySQL for database design, SQL queries, and CRUD operations, integrating databases with Java applications.
- Explored full-stack application development by integrating frontend, backend, and database technologies.

PROJECTS

Train Ticket Reservation System | Java, J2EE, JDBC, SQL, HTML, CSS, Bootstrap — GitHub **2025**

- Developed a web-based Train Ticket Reservation System that enables users to search trains, check seat availability, view train schedules, and check fares between stations.
- Implemented user authentication, registration, ticket booking, booking history, profile management, and password management using Java Servlets, JDBC, and Oracle SQL.
- Designed an admin module to add, update, delete, and manage train details, along with a user-friendly interface using HTML, CSS, and Bootstrap.

Online Bookstore Management System | Java,JDBC, MySQL, HTML, CSS, JavaScript, Bootstrap, — GitHub **2026**

- Developed a web-based Online Bookstore application that allows users to register, log in, browse available books, select quantities, and purchase books online.
- Implemented user and admin modules with features such as user authentication, book inventory management, book addition, deletion, price updates, and stock management.
- Integrated JDBC with MySQL for database operations and implemented order processing, sales history tracking, and automatic payment receipt generation.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript
Frontend Technologies: HTML5, CSS3, Bootstrap, React.js, Tailwind CSS
Backend Technologies: Node.js, Express.js, JDBC, Spring Framework, Spring Boot
Databases: MySQL, MongoDB
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, RESTful APIs
Developer Tools: Git, GitHub
